THE SAFETY SOURCE LLC

TOTAL LIGHTING SOLUTIONS - HOW IT WORKS!

The Safety Source makes this process simple and smooth. With our experienced lighting professionals we can navigate any rebate program and capture, you our customer, the largest rebate allowed.

Stocked Products: Thousands of products to suit your needs, short lead time once approved

Energy Savings: Greatly reduce your montly energy bill, typical ROI of under 2 years

Longer Lasting: LEDS last about 50X longer than incandescant, save money and time with lower maintancence costs

TYPICAL PROJECT TIMELINE

PHASE 1 - Start Of Project

The Safety Source will perform a free comprehensive lighting analysis

↓

PHASE 2 - Project Rebate Acquisition

We analyze your current lighting scheme to estimate any rebates you will receive from your utility provider

↓

PHASE 3 - Energy Savings Calculation

We calculate your new monthly electric bill based on the proposed lighting scheme

↓

PHASE 4 - Installation

We work with you to schedule a time frame and a date for installation. Once the installation is complete, you will see an immediate drop on your next energy bill. Typical ROI is under 2 year
