Rugged, reliable, and ready for anything

Built for demanding outdoor jobs, the Xbase black safety boot redefines the classic heeled work boot with field-inspired design, out-of-the-box comfort, and HexArmor's signature Wearability®.

A slip-resistant outsole keeps footing steady on rough terrain while a reinforced heel and side zones offer comfortable ankle support – all combined with a fit with zero break-in time for relentless durability and performance.

All to deliver on our head-to-toe safety promise of helping send every worker home safe, every day.

- Heel and sides reinforced with Agile Ankle Guard (AAG) for enhanced stability
- Lightweight, flexible mid-cut boot
- Non-metallic
- Water-repellent full grain leather upper
- Composite safety toe cap
- Scuff cap is integrated into upper
- Slip- and abrasion-resistant rubber outsole
- Removable comfortable insole with moisture-wicking properties
- Oil- and fuel-resistant outsole
- Made with 8% recycled content

Technology

MACSOLE™

Our proprietary rubber outsole offers superior heat (572°F), slip, and abrasion resistance – perfect for any terrain. Plus, every sole is crafted with sustainable materials for a lighter footprint.

climazone™

Found throughout the entire boot, our climate management technology regulates temperature by combining a breathable, water-resistant upper with an open-cell insole layer that helps minimize heat and sweat buildup – keeping feet fresher, longer.

HexArmor® footwear products meet ASTM F2412-24 and ASTM F3445-21 test methods and performance standards for "Personal Protective Footwear" sold in the United States. However, HexArmor® protective footwear does not provide total protection against all hazards and should only be used in conjunction with safety equipment prescribed for specific applications and within defined safety practices. OSHA recommends a full hazard assessment before implementation of Personal Protective Equipment (PPE) for a particular application. Users shall be exclusively responsible for assessing the suitability of the product as specified for any individual application or use. Product features, design, and protection are subject to change.

While HexArmor® makes every effort to ensure that our products function as described on our packaging and website, HexArmor® expressly disclaims any responsibility for any damages, injury, harm, cost, expense, or liability arising out of or related to the use or misuse of this product.
