

HAND PROTECTION

Triple-Dipped PVC Low Temperature Gloves

DESCRIPTION

These premium super flexible triple dipped PVC gloves feature a seamless soft-brushed fleece lining that keeps your hands warm and dry. The liner flexes with the glove allowing freedom of movement and reducing the hand fatigue associated with working in cold environments. The triple-dipped PVC is specially formulated for the handling of chemical residues, oils, or greasy materials and stays flexible in temperatures down to -5°F. The sandpaper grip enhances the handling of objects wet or dry. The 12-inch length provides extra forearm protection

INDUSTRY

Petrochemical	Low Temperature Applications
Oil and Gas	Maintenance
Janitorial	Material Handling
