

# HID Post Top Replacements

With ETI LED post top lamps, now you can replace inefficient HID lamps by bypassing the existing ballast and connecting the 120-277V line voltage directly to the sockets. No ballast or external driver is required, which allows the current fixture to remain in place. Plus, the unique adjustable socket adapter provides the ability to change the post top lamp from up light to down light in a snap.

Engineered for reliability and long life, our LED post top lamps come standard with built-in surge protection, as well as internal IC protection.

Input Voltage (VAC)	100-277
Diminability	Not Dimmable
Location Rating	UL Damp
CRI	80
Operating Temperature	Min -4°F (-20° C) Max 113°F (45°C)
Power Factor	>0.9
Operating Frequency (Hz)	50/60
