

HID Replacements 360°

ETi LED HID 360° replacement lamps are a convenient way to upgrade inefficient HID lamps by simply bypassing the existing ballast and connecting the 120-277V line voltage directly to the sockets. No ballast or external driver is required, which allows the current fixture to continue to be used.

Engineered to the highest standards, our HID 360° replacements come standard with built-in surge protection and internal IC protection for long life reliability.

| | |
|--------------------------|---------------------------------------|
| Input Voltage (VAC) | 100-277 |
| Diminability | Not Dimmable |
| Location Rating | UL Damp |
| CRI | 80 |
| Beam Angle | 280 |
| Operating Temperature | Min -4°F (-20° C) Max 113°F (45°C) |
| Power Factor | >0.9 |
| Operating Frequency (Hz) | 50/60 |
