### Miller® GlideLoc® Fall Arrester for Vertical Rail System - Detachable Top or Bottom

- Designed for smooth and comfortable climbing, accommodating all user experience levels and climbing styles
- Lightweight construction made from aluminum alloy, stainless steel, and polymer for durability and corrosion resistance
- Stainless steel shock absorber reduces maintenance costs compared to textile absorbing elements
- Triple-action safety carabiner ensures secure attachment and ease of use
- Includes an independent and automatic fall detection mechanism with shuttle blocking
- Visual fall indicator allows users to easily identify if the shock absorber has been deployed
- Compatible with all Söll GlideLoc ladders and guide rails installed after 1982
- Swivel carabiner provides flexibility of movement and compatibility with vertical and horizontal D-rings on harnesses
- Integrated RFID facilitates asset management
- Meets ANSI, CSA, and EN standards for international fall protection programs
