### Miller® GlideLoc® Vertical Height Access Ladder System Kit, Stainless Steel, 30 Feet

- Made of stainless steel and aluminum for long service life, even in corrosive environments
- Total 30 ft system with three 10 ft GlideLoc rails
- Components include GlideLoc rails, gated top and bottom end-stops, ladder attachment brackets and necessary hardware
- Hands-free fall protection allows for smooth and safe climbing
- Locks immediately into the safety rail during a fall
- Quiet and smooth trailing ensuring a comfortable climb
- Ergonomic design facilitates easy one-hand installation
- Shock-absorbing mechanism reduces force on the worker and system during a fall
- Fall indicator alerts users when the product needs to be removed from service
- Suitable for various industries, including wind power, telecommunications, and industrial facilities
- Designed for minimal upkeep, reducing downtime and maintenance costs
