

Chemstop® | NE240TKL

Heat resistant gloves that safeguard against chemicals

ANSI
Probe

ABOUT THE PRODUCT

These heavy-duty neoprene gloves protect against a wide range of oils and chemicals that attack natural rubber gloves, including acids, caustics, oils and grease.

Rated ANSI Level 3 resistant for protection up to 200°C / 392°F.

Terry lining provides further protection from thermal contact and diamond-grip finish palms ensure a strong grip.

APPLICATIONS
