

FROGWEAR™ DISPOSABLE CLOTHING

Premium Self-Extinguishing Disposable Coveralls with Hood

DESCRIPTION

These non-woven coveralls are a great option for those who require a protective layer over primary flame-resistant garments. The coveralls are constructed from blue, 65-gram self-extinguishing spun lace material. The hood, ankles, waist, and wrists include elastic for a secure fit.

NON-WOVEN BURN DATA

Data from third-party ASTM F1930 Pyroman Manikin test:

The NW-COV800FR* coverall helps to significantly reduce total body burn percentage when worn as an ensemble with primary flame-resistant coverall garments.

MATERIAL	BODY BURN RESULTS
CJS32 UltraSoft® 7-ounce 88% cotton/12% high tenacity nylon twill	21.9% Total Body Burn Percentage
Ensemble of NW-COV800FR* worn with CJS32 UltraSoft® 7-ounce 88% cotton/12% high tenacity nylon twill:	0% Total Body Burn Percentage
CJS08 Indura® 7-ounce 100% cotton twill, worn singularly as the primary Flame-Resistant garment:	41.4% Total Body Burn Percentage
Ensemble of NW-COV800FR* worn with CJS08 Indura® 7-ounce 100% cotton twill:	2.63% Total Body Burn Percentage

The ASTM F1930 test data shows how combining an ensemble of a disposable flame retardant/self-extinguishing coverall over a primary flame-resistant coverall could be life-changing and cheap insurance against serious burns and debilitating injuries.

*The NW-COV80FR is made using the same material as the NW-COV800FR, the only difference is that the NW-COV80FR configuration has elastic at the ankles and features a hood instead of a collar.

ITEM **NW-COV80FR** SIZES **S-5XL**

FEATURES

- Self-extinguishing as defined by ASTM D6413 (less than 2.0s flameout / less than 6-inch char length). This garment should never be used where an arc flash or flash fire hazard is present.
- Made from anti-static self-extinguishing/flame-retardant spunlace material
- Breathable
- Reinforced triangle crotch
- Designed for single-use
- Packaged: 25 pieces/case
- Meets ANSI/ISEA 101-2014 sizing standards
- EN 1149-1: 2006 (Protection against antistatic): Pass

*Designed to be worn over flame-resistant garments. This garment should never be used where an arc flash or flash fire hazard is present. This garment is not flame resistant rated. Do not use this garment for primary fire protection. This flame retardant garment is intended to provide secondary protection and is meant to be worn over your primary protective garments. Avoid open flame or intense heat.
