

Outdoor Convex Mirrors

Outdoor Convex Mirrors help monitor blind spots and are designed to prevent intersection accidents in industrial applications.

Convex mirrors can be positioned to reflect a hidden area to a forklift operator. These mirrors can also be directed to allow equipment operators to view co-workers approaching from behind to reduce accidents.

Three Mounting Brackets Provide Extra Stability In Unpredictable Outdoor Conditions

Convex mirrors should be mounted in positions that reflect the view of the traffic moving from neighboring directions. Properly placed mirrors can help monitor entrances and alleys for unauthorized visitors.

- **20% Brighter Than Glass Mirrors**
- **Available in Polycarbonate**
- **Available with Steel Back**
- **Less Distortion**
- **Economical**

New for High Traffic Areas

Outdoor Wide View Convex
