

Cool Grip® | SPFGSS

Maximum heat protection with strategic silicone-striped palms for hot parts handling

ABOUT THE PRODUCT

Our Cool Grip® SPFGSS gloves offer maximum heat protection with silicone stripes on the palm for grip and comfort when handling hot parts. Made with latex-free materials, they provide 360° cut protection with ANSI A3 cut resistance and internally tested for protection beyond maximum ANSI 5 standards for extreme heat resistance up to 752°F / 400°C. Strategically placed silicone palm stripes increase grip and allow air channeling for additional heat resistance.

ALTERNATIVE VERSIONS

SKPX/PSS, TRGSS

APPLICATIONS

FOUNDRY, GLASS MANUFACTURING, METAL FABRICATION, PLASTIC MANUFACTURING
