## TenActiv™ STAGCTPU

Gloves designed with zones that tear away to avoid hazardous snags in fast-moving rotational equipment

When working around rotating equipment, gloves can be a safety hazard. If a glove is snagged, a user can easily be put at risk of a hand or arm injury. For these environments, our STAGCTPU gloves were designed with 12 tear-away zones intended to tear in case of snagging. These gloves also offer well-rounded protection, including ANSI Level A5 cut resistance and ANSI Level 4 Puncture resistance. They are also designed for dexterity and comfort, providing a high level of touch-sensitivity.
