

Solar Billboard Light

Our budget friendly Solar Flood can be used in garden, courtyards, Landscapes, Billboard as well as on building for extra parking lot light. You don't have to invest thousands of dollars over the next decade paying for the power to run it. Instead, that free renewable energy from the sun keeps your home or business lit and secure. No messy wiring into an electrical system, they are very easy to install that just about anyone can do it.

- Adjusting the solar panel angle maximizes solar collection and allows snow to slide off
- The solar flood light has separate solar panel to collect the energy from sun.
- These flood light have smart controller that enables the power brightness, and lighting time to be adjusted via remote control.
- 130 Lumen per watt and IP67 rated
- 3 Years warranty on all components
- The light automatically switches on at dusk and switches off at dawn. Permanent lighting for first 4 hours at 100%, 4 hours at 50% and remaining hours at 30% when motion is detected power turns to 100%.
- PWM and MPPT Controller automatically track the maximum power point according to the weather verification.
- Bracket Option: Yoke mount and Slip Fitter

Solar Billboard Light

Product Design and Benefits

The Solar Billboard Light / Solar Sign Light uses 100% less power than traditional flood lights. The battery, solar controller, and sensor are built-in, and only need to be connected to an 18V panel via a MC4 plug. No other operations are needed, which allows for an easy and quick installation. Also, these lights have a smart controller that enables the power brightness, and lighting time to be adjusted via remote control.

LED Power

This Solar Billboard Flood Light uses 72 pieces of Philips Lumileds 1W SMD3030 as a light source, the 72 pieces of LEDs are spread as 4 pieces in series connection and 18 pieces in parallel connection.

Solar Billboard Light

Product Structure

The Solar Sign Light has a streamlined design that is made of Aluminum Die Casting.

- Aluminum Die Casting Heat Sink

- Solar Controller

- Waterproof Rubber

- Microwave / PIR Sensor

- Battery Pack Holder

- Lithium Battery Pack

- Mounting Options

- Yoke Mount Included

- On / Off Switch

- 

REMOTE SETTING
- 

MC4 PLUG IN CONNECTION
- 

MICROWAVE SENSOR
- 

BATTERY INSIDE
- 

12HRS/DAY
140LM/W

Solar Billboard Light

Operation

1. Use the MC4 connector to plug the light into the solar panel.
2. Press the button on the main body to switch to the ON position to make the light turn on automatically after sundown.

(the lighting mode was set by the factory before delivery)

3. The Solar Billboard Light / Solar Sign Light is now ready for use. You can also use the remote control to change the lighting modes or brightness.
4. Press the button into the OFF position then the light will stop working, or use the remote control to turn off the light.

Solar Billboard Flood Light

Easy Installation

The Included Accessories are The Solar Billboard Light / Solar Sign Light, solar panel, and solar panel adapter bracket with screws.

Solar Panel

Solar Panel Adapter Bracket With Screws

1. Assemble the solar panel bracket with the screws

2. Attach the solar panel bracket to the solar panel

3. Connect the other side of the solar panel

4. Mount the solar panel on the desired surface

5. Attach the light into place for ideal lighting

Solar Billboard Light

Optimum Panel Orientation

The Solar charge in a battery pack won't last forever. The off-grid system relies on stored solar energy for autonomy. Angling your solar panels properly can boost the power intake of your solar lighting system. You want to angle your solar panels at a tilt based on the area's latitude.

Tip for Maximum Power

You can increase the tilt 15° in the winter or decrease 15° in the summer. In this way you can get the maximum sunlight to recharge the battery.

Best Facing Direction of Solar Panel

The area will dictate the installation of the fixtures and will sometimes prevent the lights from facing south. Panels facing West & East won't get as much light as Southern facing panels, but will still collect a good amount of sunlight. A North facing panel also works, but it will take longer to charge than any other direction. This would mean that the solar charge will be less optimal if installations are facing North.

Optimum Panel Orientation

SOLAR AREA LIGHTS

Solar Billboard Light

ENERGY SAVING

Energy saving by 100% less power consumption than traditional flood light, endless power generated from solar.

HIGH LUMENS

Adopting 72pcs of Philips 1W SMD LED, driving by lower current, achieve more than 150lm/W as practical lumens output.

IP67 WATERPROOF

Designed based on water flow idea, with round corner, screws are sealed by rubber cover, fixtures are fixed tightly and properly, IP67 waterproof standard.

SOLAR CONNECTION

MC4 male & female plugs directly to 18V solar panel. quick and easy for connection. 2.5mm² power cord for less voltage drop.

COMPACT SYSTEM

Battery and solar controller, sensor are built-inside of light, only need to be connected to 18V system, NO more other operation, easy ,simple and quick installation.

Troubleshooting

Problem	Problem Cause	Solutions
Lamp doesn't work at all	Light source is damaged	Replace it with the same light source
	The battery has run down	Charging the battery
	Light doesn't work in day time	Changing the light setting with remote control
Battery can't get charged	Positive & negative of solar panel are connected conversely.	Connect the positive & negative of solar panel to a correct position.
