

# Spilfyter® Wipe Kit Instructions

## *Directions:*

1. Open the bucket lid, if the dry wiper roll is not already loaded, load one of the refill rolls into the bucket.
2. We suggest using between 64 and 96 oz of your preferred cleaning and/or disinfecting solution, however **bleach or alcohol-based chemicals are not recommended**. We encourage you to test performance with your chosen solution.
3. Slowly pour the solution over the dry wipes (in the bucket) in a circular motion working your way from the outside towards the center.
4. Feed the center wipe through the hole in the lid and close the air-tight lid.
5. For best results, pull straight up on the wipes to avoid tearing. Wipes should only be dispensed through the lid wet. The first couple wipes may tear until the core corrects itself.

**Do not add your cleaning/disinfecting solution to the wipe kit until you are ready to use it.**

## Notes:

Your bucket must be labeled according to OSHA regulations. Once you use your bucket with your chosen solution, you cannot use it with any other cleaner or disinfectant. Never mix with any other chemical. Store your bucket at room temperature with your other chemical products.

**OSHA Labeling Requirements** - Employers must ensure that no worker uses, stores, or allows any other person to use or store any hazardous substance if the container does not meet the following labeling requirements in OSHA's Hazard Communication standard [29 CFR 1910.1200(f)(1)]:

- The identity of the chemical and appropriate hazard warnings must be shown on the label.
- The hazard warning must provide users with an immediate understanding of the primary health and/or physical hazard(s) of the hazardous chemical through the use of words, pictures, symbols, or any other combination of these elements.
- The name and address of the manufacturer, importer or other responsible party must be included on the label.
- The hazard label message must be legible, permanently displayed and written in English.

## Important!

*NPS Spill Control does not make any claims regarding the shelf life or efficacy of the Spilfyter Wipe Kit once your preferred cleaning and/or disinfecting solution has been added to the wipes. Any questions about compatibility or any other concern, should be discussed with preferred chemical manufacturer.*
